

# m-View Platform

## Matching functionality and mobility

m-View is a world-first, award-winning video system that enables live, wireless video streaming from anywhere to anyone, easily and reliably.

### PRODUCT FEATURES

- Choose from a range of m-View products to meet your needs
- Simple and easy to use
- Cost-effective solutions
- Allows viewing on a range of devices, including mobiles, desktops, laptops and command centre screens
- Snapshot feature gives still images for intricate details
- Chat facility to enable better and instant communication between all parties
- Videos can be reviewed post-event for training, analysis and evidence
- Allows multiple concurrent remote viewers
- Optimised for 3G and wireless networks
- GPS enabled

The m-View system is optimised for 3G and wireless networks and enables live video streaming from mobile phones or just about any camera, to mobile phones and PCs/laptops. The system allows users to capture, manage and view multiple feeds of live, high quality video, wirelessly.

A suite of customisable products has been built on the m-View platform, including m-View Mobile, MAVEO and the m-View GoPack. Momentum also provides custom solutions to meet your needs.

#### ▶ m-View Mobile

##### Unparalleled mobility

m-View Mobile allows you to broadcast live video from any m-View enabled mobile phone, for a truly on-the-go solution.

m-View Mobile matches mobility with functionality to empower workers in the field and the office.

#### ▶ MAVEO

##### Anytime, anywhere surveillance

MAVEO is a rugged, portable video-streaming solution that is easily and rapidly deployed for remote, unmanned monitoring. MAVEO can meet fixed or temporary deployments to give the viewer an overall picture of any situation. It can also be remotely managed, and with full pan, tilt and zoom is ideal for in-car video streaming, aerial and unmanned surveillance.

#### ▶ m-View GoPack

##### Live video on the go

The m-View GoPack allows roaming, live transmission of video and audio from any person's point of view, putting the viewer and/or decision makers on the ground, instantly.

The GoPack delivers unrivalled mobility in a self-contained pack.

#### ▶ The m-View advantage

m-View is an Australian product, which gives you live, high quality video and a variety of features and benefits. m-View can help you:

- Make better decisions, faster
- Gain instant access to experts and improve collaboration
- Reduce costs – travel expenses, training, downtime and maintenance costs
- Manage risk and improve safety with immediate access to specialist resources
- Review archived videos for training, analysis and/or evidence
- Perform diagnostic and maintenance tasks remotely
- Manage and maintain capital assets.

► **m-View platform** m-View captures, compresses and streams video footage via a wireless internet connection, most commonly a 3G network.

► **How it works**

m-View provides an integrated hardware and software solution, allowing users to stream live video from anywhere, to anyone. Hardware includes video cameras, phones and computing devices, while software includes:

- the **m-View Broadcaster** to capture and stream the video footage;
- the **m-View Server**, which distributes sound and vision to multiple viewers; and
- the **m-View Viewer**, so viewers can access and manage multiple video streams.

► **m-View at work**

m-View is being used across a variety of different industries – from delivering on-the-ground and in-air live video for

emergency situations (ambulances, fires, floods, earthquakes, etc.) to virtual medical consultations.
